Order Entry System

Interfacing Capabilities for Flat Glass Fabricators

Our web-based Order Entry System (OES) allows users to manage all production data including orders, racks, schedules, remakes, glass stock, low priority items, purchased items, reports, customers, shifts, settings, and users.

This simple, straight-forward system is used to import data from an existing customer order entry system, or manually enter data, necessary for other HP3 Software products such as BatchBan Cutting, BatchBan Laminating and BatchBan Tempering.

Easy Accessibility and Operation with No User Limit

Users can access and manage HP3's OES from anywhere on their network once installed; There is no limit to the number of network users, nor a yearly licensing fee

Seamless Integration with Existing OES

Data is transferred through bridge files and stored in a Microsoft SQL Database

Enhanced Security

Access to sensitive information can be controlled by the implementation of user defined levels

Microsoft SQL Database for Greater Data Integrity

Provides reliable and redundant data storage and retrieval which allows for less downtime and higher productivity

Flexible Racking

User can define custom racking or perform third party racking instructions

Effortless Management of Remakes

Remote remakes can be initiated effortlessly saving both time and money

Extensive Shape Library

HP3's shape library contains over 150 shapes and can also accept DXF files as well as other suppliers' shape libraries
